13394

NOTE X
Within the 12-nautical mile Territorial Sea, established by Presidential Proclamation, some Federal laws apply. The Three Nautical Mile Line, previously identified as the outer limit of the territorial sea, is retained as it continues to depict the jurisdictional limit of the other laws. The 9-nautical mile Natural Resource Boundary of the Gulf coast of Florida, Texas and Puerto Rico, and the Three Nautical Mile Line elsewhere, is the inner limit of the Exclusive Economic Zone and the seaward limit of the jurisdiction of the states. The 24-nautical mile Contiguous Zone and the 200-nautical mile Exclusive Economic Zone were established by Presidential Proclamation. Unless fixed by treaty or the U.S. Supreme Court, these maritime limits are subject to modification.

COPYRIGHT
No copyright is claimed by the United States Government under Title 17 U.S.C. However, other nations may claim intellectual property rights on the compilation of data depicting the foreign waters shown on this chart.

COLREGS, 80,105 (see note A)
International Regulations for Preventing Collisions at Sea, 1972.
The entire area of this chart falls seaward of the COLREGS Demarcation Line.

TIDE TABLES
U.S. TIDE TABLES should be used in UNITED STATES WATERS and CANADIAN TIDE TABLES in CANADIAN WATERS.

1st Ed.- Dec. 1992 KAPP 2886

SUPPLEMENTAL INFORMATION
Consult U.S. Coast Pilot 1 and 5 and Canadian Sailing Directions (East Coast) for Nova Scotia and Bay of Fundy, for important supplemental information.

POLLUTION REPORTS
Report all spills of oil and hazardous substances to the National Response Center via 1-800-424-8802 (toll free), or to the nearest U.S. Coast Guard facility if telephone communication is impossible (33 CFR 153).

DEPTHS IN METERS AND DECIMETERS
AT MEAN LOWER LOW WATER IN U.S. WATERS AND
AT LOWEST NORMAL TIDE IN CANADIAN WATERS

Additional information can be obtained at nauticalcharts.noaa.gov.

HEIGHTS
In U.S. waters, elevations of rocks, bridges, landmarks and lights are in meters and refer to Mean High Water while contoured summit elevations are in meters and refer to Mean Sea Level. In Canadian waters, elevations and clearances are in meters above High Water Large Tides while spot elevations in italic figures and contours are in meters above Mean Sea Level.

AUTHORITIES
Hydrography and topography by the Canadian Hydrographic Service with additional data from the National Ocean Service, Coast Survey, International Boundary Commission, U.S. Geological Survey, Corps of Engineers, U.S. Coast Guard and Canadian Ministry of Transport.

DEPTHS
Depths in U.S. waters are referred to Mean Lower Low Water Datum; depths in Canadian waters are referred to Lowest Normal Tide. The difference in datums means that depths in Canadian waters will appear shallower by approximately 1 meter than in U.S. waters. Refer to the Ildex and Current Tables at the appropriate country when crossing the International Boundary Line. Also see Note B for depth information concerning Lubec Channel and south of Quoddy Narrows.

CAUTION
SUBMARINE PIPELINES AND CABLES
Charted submarine pipelines and submarine cables and submarine pipeline and cable areas are shown as:
Pipeline Area — Cable Area
Additional uncharted submarine pipelines and submarine cables may exist within the area of this chart. Not all submarine pipelines and submarine cables are required to be buried, and those that were originally buried may have become exposed. Mariners should use extreme caution when navigating vessels with deep draft or using commercial fishing gear in areas where pipelines and cables may exist, and when anchoring, dragging, or trawling.
Covered wells may be marked by lighted or unlighted buoys.

FISH TRAPS
Numerous uncharted fish traps may exist shoreward of the 10 meter curve.

AIDS TO NAVIGATION
Consult U.S. Coast Guard Light List for supplemental information concerning aids to navigation.
See Canadian List of Lights, Buoys and Fog Signals for information not included in the U.S. Coast Guard Light List.

CAUTION
Temporary changes or defects in aids to navigation are not indicated on this chart. See Local Notice to Mariners.
Lights are extinguished months or when endangered by ice, certain aids to navigation are replaced by other types or removed. For details see U.S. Coast Guard Light List.

RADAR REFLECTORS
Radar reflectors have been placed on many floating aids to navigation. Individual radar reflector identification on these aids has been omitted from this chart.

WARNING
The prudent mariner will not rely solely on any single aid to navigation, particularly on floating aids. See U.S. Coast Guard Light List and U.S. Coast Pilot for details.

NOTE A
Navigation regulations are published in Chapter 2 U.S. Coast Pilot 1. Additions or revisions to Chapter 2 are published in the Notice to Mariners. Information concerning the regulations may be obtained at the Office of the Commander, 1st Coast Guard District in Boston, MA or at the Office of the District Engineer, Corps of Engineers in Concord, MA.
Refer to charted regulation section numbers.

BAY OF FUNDY
VESSEL TRAFFIC SERVICES
Traffic Services calling-in point with number arrow indicates direction of vessel movement.
The international boundary is the outer limit of Canada's Bay of Fundy Vessel Traffic Services zone. Vessels must report on entering or leaving the zone.
For additional information concerning these services see the Canadian publication Radio Aids to Marine Navigation (Atlantic, St. Lawrence, Great Lakes, Lake Winnipeg and Eastern Arctic), Part 3.

NOTE C
Mariners are cautioned that ferries may deviate from their published standard routes due to inclement weather, traffic conditions, navigational hazards, or other emergency situations.

MARINER ACTIVATED SOUND SIGNALS
Sound signals labeled with (MPASS) require user activation. See USCG Light List.

TIDAL INFORMATION

PLACE		Height referred to datum of soundings (MLLW)		
NAME	(LAT/LONG)	Mean Higher High Water	Mean High Water	Mean Low Water
		meters	meters	meters
Eastport, ME	(44°54'N/66°59'W)	5.9	5.7	0.1
Campobello Is., N.B.	(44°52'N/66°55'W)		4.8	0.1
West Quoddy Head, ME	(44°48'N/66°56'W)	5.0	4.0	0.1
North Head, N.B.	(44°46'N/66°45'W)		6.0	0.9

NOTE: The following levels for Campobello Island and Grand Manan Island are based on the Canadian Datum of Soundings (CD).
Depths and heights located in datum columns indicate unavailable datum values for a tide station. Real-time water levels, tide predictions, and tidal current predictions are available on the Internet from http://tidesandcurrents.noaa.gov.
(May 2013)

COBSCOOK BAY TURBINE
Vessels entering and departing Cobscook Bay, Maine should exercise caution in the area of an underwater turbines located in position 44°54′36″N 67°00′45″W. All vessels and persons are advised to avoid anchoring, diving, dredging, dumping, fishing, trawling, laying cable, or conducting salvage operations in this area.

SOURCE DIAGRAM
The outlined areas represent the limits of the most recent hydrographic survey information that has been evaluated for charting. Surveys have been banded in this diagram by date and type of survey. Channels maintained by the U.S. Army Corps of Engineers are periodically resurveyed and are not shown on this diagram. Refer to Chapter 1, United States Coast Pilot.

CAUTION
This chart has been corrected from the Notice to Mariners (NM) published weekly by the National Geospatial-Intelligence Agency and the Local Notice to Mariners (LNM) issued periodically by each U.S. Coast Guard district to the dates shown in the lower left hand corner. Chart updates corrected from Notice to Mariners published after the dates shown in the lower left hand corner are available at nauticalcharts.noaa.gov.

This is the Last Edition of this chart. It will be canceled on Nov 29, 2023
5th Ed., Aug. 2013. Last Correction: 5/31/2023. Cleared through:
LNM: 4223 (10/17/2023), NM: 4223 (10/28/2023), CHS: 0923 (9/29/2023)
Measure the distance between two tick marks that should measure six inches (152 millimeters).
If the line does not measure six inches (152 millimeters), this copy is not certified safe for navigation.

(POD) providers fulfill a vessel's requirement to carry a navigational chart "published by the National Ocean Service" in accordance with federal regulations, including but not limited to 33 C.F.R. 164.33(a), 33 C.F.R. 164.72(b), and 46 C.F.R. 28.225(a). POD charts meet stringent print standards and can be recognized by an official certification of authenticity printed on the chart. A list of POD providers can be found at: nauticalcharts.noaa.gov/pod
